

DOW CORNING AIA DC001

Please see the attached summary of AIA Presentations available from Dow Corning.

We thought that AIA DC001—*Silicone Sealants in Construction—What Every Architect Needs to Know*—may be the most suitable presentation for your office during our first visit.

This presentation covers the following topics:

- Sealant Chemistries
- Role of a Sealant
- Properties
- Applications
- Sealant Installation
- Precured Silicone Sealants
- Silicone Elastomeric Coating
- Structural Glazing

The learning objectives upon completion of the course include:

- Identify the difference between a silicone and organic sealant
- Understand the function of sealants in structural and weathersealing applications
- Identify key properties of sealants
- Understand basic proper sealant application/installation
- Be able to explain the function and appropriate design for structural and weatherseal joints
- Understand the properties and role of silicone elastomeric coatings

We look forward to visiting your offices and offering the AIA presentation. This particular AIA offers 1 learning unit, which is an HSW credit.
